

Weixelbaum Chardonnay Beerenauslese

Kamptal, Austria

Kamptal boasts a variety of terroir, ranging from loess over gravel to striking parcels of primary rock and even volcanic elements. A hot and dry microclimate, the soil is geologically spectacular, as it originates from 270 million year old Permian Period, being a desert-like sandstone base with volcanic particles. The region has long sloping vineyards as well as steep slopes that are terraced such as the Gaisberg single vineyard.

Protection of nature starts with the green manuring of the vineyards. The result of this sowing is a blossoming of senfdotters, phacelia, fennel, various kinds of clover and other plants. The objective is the holistic cultivation of the vineyard and of its soil, so to ensure and sustain the high quality of the grapes.

DETAILS

Grapes 100% Chardonnay

Tasting Notes Wild thyme and moss blaze a savory trail before honeyed sweetness, cut by wonderfully precise, lemon-sharp acidity. This is linear and superclean, and that wonderful sweet-acid contrast should make this BA a winner both with the dessert trolley and the cheeseboard.
